PROFESSIONAL SUMMARY

Backend Developer with experience in Java, Spring Boot, API development, software testing and database management. Familiar with backend application architecture, authentication systems and modern development practices. Strong interest in building scalable applications and growing within backend software engineering.

WORK EXPERIENCE

DATANUCLEUS INC.

Software Testing Intern

April 2025 - October 2025

- Participated in frontend and backend software testing processes for IoT-related platforms which involved validating API responses, application workflows and backend functionalities.
- Collaborated with developers during testing and debugging stages while creating and reviewing use case documentation for software testing processes
- Assisted in identifying bugs, system issues, unexpected application behavior and validating software functionalities and user workflows
- Participated in software validation to ensure system requirements were met
- Assisted in reviewing platform behavior and identifying usability or functional issues

BEYONDSYSTEMS NG.

Software Engineering Intern

April 2025 - October 2025

- Supported documentation and presentation preparation for software products and stakeholder meetings
- Collaborated with analytics and technical teams during product review and testing activities
- Contributed to organizing software-related tasks and workflow tracking for webinar preparation
- Assisted in reviewing platform behavior and identifying usability or functional issues
- Worked with teams on communication and presentation of technology solutions
- Supported digital marketing and branding activities for software platforms
- Conducted endpoint validation using API testing tools such as Postman, etc.
- Verified request/response handling and HTTP status behavior
- Analyzed software behavior using documented use cases and testing scenarios

EDUCATION

BSC. SOFTWARE ENGINEERING

AUGUSTINE UNIVERSITY, ILLARA-EPE

2022 - 2026

- CGPA: 4.18 / 5.0 (Second Class Upper)

SKILLS

Languages	Java, JavaScript, HTML, CSS
Frameworks & Libraries	Spring Boot, Spring Security
Databases	MongoDB, PostgreSQL, MySQL, Redis
Tools & Technologies	REST APIs, CRUD Ops, Postman, API testing, functional testing, Software testing, JWT, OAuth authentication and authorisation,
Soft Skills	Problem solving, team collaboration, communication skills, adaptability, analytical thinking, attention to detail, time management

PROJECTS

(More projects available on GitHub or my live web portfolio)

Task Management System

Technologies: Java, Spring Boot, MongoDB

- Built a task management backend application using Spring Boot
- Implemented CRUD operations for task creation, updating, retrieval, and deletion
- Designed REST API endpoints for managing tasks
- Structured application using backend development principles
- Explored Spring Boot architecture and request handling

Library Management System (FullStack)

Technologies: Java, Spring Boot, Spring security, MongoDB, HTML, CSS, JS and Thymeleaf for end-to-end Integration

- Built a RESTful backend application using Java and Spring Boot
- Implemented CRUD operations for managing library records
- Connected the application to MongoDB for data storage and retrieval
- Implemented authentication and authorization using Spring Security
- Configured role-based access control for ADMIN and USER endpoints
- Secured protected routes using in-memory authentication
- Explored backend security concepts and access management

CERTIFICATIONS

Augustine University

Dean's List Honours Recipient

JP. Morgan (Forage)

Software Engineering Job Simulation (Backend Development)

Issued Aug 2025

Credential ID: QBX6QRZ8RREkTs5mY

Brightflare Technologies

Software Testing

Issued Mar 2025
